

VERSION 1

1/11/2010

The following instructions are offered in order to create a Facebook application to add links to a Facebook compatible version of your QuestionPoint Qwidget.

In order to build a Facebook application you must accept the Facebook application terms and conditions. It is up to your library to review and agree to the Facebook terms and conditions.

STEP 1

Create an HTML page called fb.html

fb.html

```
<html>
<head>
<meta http-equiv="Content-Type"
content="text/html; charset=utf-8"/>
</head>
<body>
</body>
```

## STEP 2

Place the edited qwidget code snippet as shown into the fb.html page between the body tags

```
<!-- Beginning of QuestionPoint qwidget code. -->
```

```
<div id="qpchatwidget" ></div>
```

```
<script id="qp.bootstrap" type="text/javascript"
src="http://www.questionpoint.org
/crs/js/qwidget/qp.bootstrap.js?langcode=1&instid=XXX&skin=facebook&size=sta
ndard" charset="utf-8">//<noscript>Please enable javascript to chat with
librarians online</noscript></script>
```

NOTE: This code is NOT the same code as the qwidget code used to place on your library website, copied from the Admin module in QuestionPoint. It has been edited specifically for Facebook. It will not work in any other types of website.

### Be sure to

**-replace XXXX with your 5 digit institution id**

fb.html:

```
<html>
<head><meta http-equiv="Content-Type"
content="text/html; charset=utf-8"/>

</head>

<body>

<!-- Beginning of QuestionPoint qwidget code. -->

<div id="qpchatwidget" ></div>

<script id="qp.bootstrap" type="text/javascript"
src="http://www.questionpoint.org/crs/js/qwidget/qp.bootstrap.js?lang
code=1&instid=XXXX&skin=facebook&size=standard" charset="utf-
8">//<noscript>Please enable javascript to chat with librarians
online</noscript></script> </body>

</html>
```

## STEP 3

Copy the fb.html page to a public web server

Test to be sure that -the qwidget is visible on the page you have created through an accessible URL such as <http://xxxxx.xxx/fb.html>

You will need this URL to be active for step 4.

Begin the Facebook application building process, using the Facebook Developer tools.

## STEP 4

Create the Facebook application

4.1 Fill out the Canvas page. When your done, click on Basic

Create a name for your FB qwidget's home directory

This must have 7 or more characters (no numbers)

The screenshot shows the Facebook Canvas settings page. The left sidebar has a menu with 'Canvas' selected. The main content area is divided into sections: 'Required URLs', 'Optional URLs', and 'Canvas Settings'. The 'Required URLs' section has 'Canvas Page URL' set to 'http://apps.facebook.com/fbqwidget/' and 'Canvas Callback URL' set to 'http://www5.odc.org/questionpoint/inf/fbqwidget.html?'. The 'Optional URLs' section has 'Post-Authorize Redirect URL' empty. The 'Canvas Settings' section has 'Render Method' set to 'IFrame', 'IFrame Size' set to 'Smart size', 'Canvas Width' set to 'Full width (760px)', and 'Quick Transitions' set to 'Off'. A 'Save Changes' button is at the bottom. Annotations include a blue box on the left with instructions, a blue box on the right pointing to the callback URL with the text 'This is the URL to your fb.html page. Make sure you add a ? to the end of the URL', and a blue box at the bottom with a list of settings.

**Required URLs**

Canvas Page URL:

Canvas Callback URL:

**Optional URLs**

Post-Authorize Redirect URL:

**Canvas Settings**

Render Method:  IFrame  FBML

IFrame Size:  Smart size  Resizable

Canvas Width:  Full width (760px)  Old width (646px)

Quick Transitions:  On  Off

Canvas settings:

Render Method:

**IFrame**

IFrame Size:

**Smart**

Canvas Width

**Full**

Quick Transitions

**Off**

This is the URL to your fb.html page. Make sure you add a ? to the end of the URL

4.2 Fill out the BASIC page. When you're done, click on Authentication

(don't hit Save Changes until you're all done)

**Put your application name**

**Autofilled by**

**In this section you have the option to:**  
 Add a description  
 Set the language  
 Add an image and an icon

**Contact information if your users need help**

**You don't need to put anything here**

**Basic** | **Essential Information**

**Authentication**

Application Name:

Application ID: 188600185795

API Key: 554e1f1a3f9f77927ffdd6f333deb26

Secret: d20f4d67f812cca956e759973492fc4d

**Basic Information**

Description:

Icon: [Change your icon](#)

Logo: [Change your logo](#)

Language:

Developers: Carol Questionpoint Remove

**Contact Information**

Developer Contact Email:

User Support Address:  Email  URL

**User-Facing URLs**

Bookmark URL:

Help URL:

Privacy URL:

Terms of Service URL:

4.3 Fill out the Authentication page, click on Profiles when done

**Basic** | **Authentication Settings**

**Authentication**

Installable to?  Users  Facebook Pages

Which types of Facebook profile can your application be installed to?

**Authentication Callback URLs**

Post-Authorize Callback URL:

Post-Remove Callback URL:

**You don't need to put anything here**

**In this section you have the option make the qwidget installable to your users only, on Pages only, or both**

[Save Changes](#)

You will be taken to the Application profile page. If you need to make any changes, you can make changes by clicking on the “Edit Settings” link. Here you can submit the application to the Application Directory, Advertise your application as well as see the URL for your application.

OCLC cannot help you with any part of the Facebook Application Directory or Advertising processes. Also we cannot troubleshoot issues with the Facebook API for the application.
